Summary

IT Professional with inclusive knowledge and hands-on experience in Information Security, System Administration, and IT support domains. Overall 13+ years of career in the IT Services and financial industry.

IT Security:
Developed and updated security policies, and procedures and incorporated processes according to the industrial standards and frameworks. Played a primary role in implementing information security projects such as SIEM, SOC, VAPT service, PAM, ISO27001 ISMS certification, Risk assessments, etc. from start to end. Carried out internal security audits to point out vulnerabilities and assist in remediation. Conducted periodic cybersecurity awareness training among employees to meet regulatory compliance, promoted security-driven culture, and made them aware of the consequences of any security breaches by potential threats.

IT Administration:
Installed, configured, tested, deployed, and managed servers, storage devices, backup devices, network devices, operating systems, applications, and communication links of DC, DRS, etc. Documented and resolved IT technical issues on desktops, servers, programs, laptops, printers, IP phones, and network devices. Developed and maintained IT strategic plan, technical documentation, change management plan, operational procedures, incident report, FAQ, user manual, network and system policies, and procedural manuals.

Summary of Skills: IT Security, System Administration, IT Service Desk, Data Analysis, Policy & Processes, Cybersecurity, SIEM, VAPT, ISO 27001, Internal Audit, Information Systems Analysis, Identity Access Management, Content writing, Windows and Linux, Active Directory, Exchange, SCCM, Servers, Desktops and Peripherals, etc.
